Paris is known as the ‘City of Love and Romance’ and is regarded as one of the, if not the, most beautiful city in the World. This history behind the marvelous city is phenomenal from it’s origins, through to the time of Napoleon, to being bombed and almost destroyed during WW2.

For your first SL Assessment Piece, your task is to visit Paris 1900, a SL Destination that has been created to share and show what Paris may have looked like in 1900. It contains all of Paris’ major tourist attractions as well as many other areas of interest.

You are required to visit this destination, take up to 10 screen shots of famous landmarks you visited, and create a 3 minute iMovie documentary on Paris, using second life as a means of traveling through that particular place. Choose 3 famous landmarks and comment on these explaining what they are and what their purpose and history is. Include screen shots from SL. Information can be text or spoken. You have 3 hours to complete this.
